Skills

- Professional experience in Javascript/Typescript and with the following associated technologies; NodeJS/NPM, React, Webpack, HTML5 including canvas, CSS/LESS, Redux, InversifyJS, JQuery, Git.
- Professional experience working in an Agile team following SCRUM methodologies, with the aid of Jira, Bitbucket and Confluence.
- Additionally, experience in VueJS and a working understanding when it comes to C# and SQL.

Work Experience

Wren Kitchens, Junior Javascript Developer

August 2019 - Present

My time at Wren has been spent working on a large-scale, data-driven Typescript project which is used by every Wren showroom in the country. I have worked on multiple teams, handling both bug fixes and the addition of new features. This has meant working on everything from data management to complex three-dimensional coordinate calculation to UI updates.

The University of Sheffield, Residence Life Mentor

September 2018 – June 2019

My role involved offering guidance and support to students living in the halls of residence, as well as being a bit of a friendly face students could feel comfortable talking to.

The Mission Public House, Assistant Manager

June 2017 – September 2018

I took this position during a year's leave from University. I was responsible for the day-to-day running of the business, often leading a team of 10+ people, in a busy city centre nightlife venue. My duties included everything from working the bar to ordering stock and handling weekly takings/associated paperwork.

Personal Profile

A charismatic and driven individual with a deep-rooted and genuine interest in everything IT-related. I have an appetite for knowledge and I'm happiest when I'm learning something new or being challenged on what I already know. I spend my spare time building on my coding skills. Everything from web development to assembly, whatever has made me ask a question that day. I'm also a keen photographer and Rubik's cube solver.
